

A

Deconvolution vs measured immune infiltration

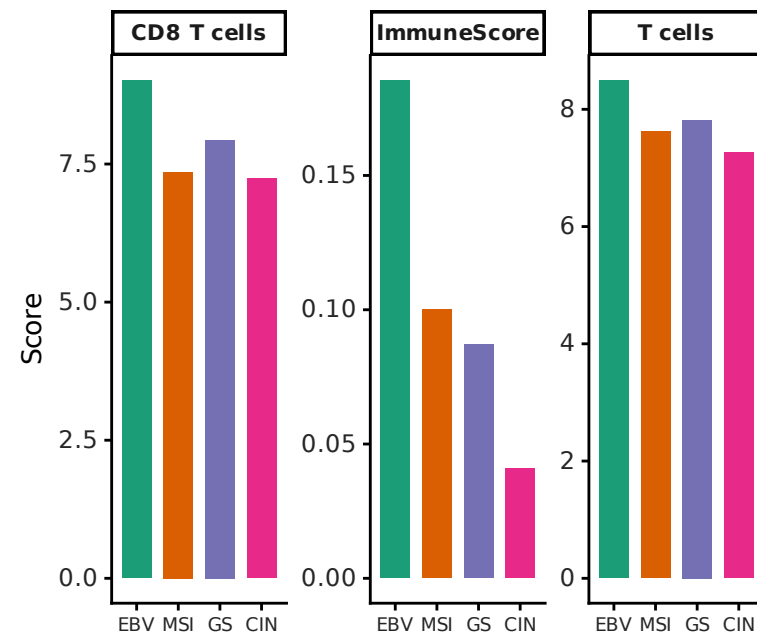

Spearman correlation against pathologist-scored values (n = 272-274)

B

Immune scores by molecular subtype

all Kruskal-Wallis $p_{adj} < 1e-6$ (EBV/MSI immune-hot)

C

Tissue microbiome: tumour-vs-control separation across three cohorts

Bray-Curtis PERMANOVA R^2 ; Japan cohort shown before and after flowcell adjustment
